Fusion Gel Mattress

Fusion Gel Mattress

Fusion Gel Mattress

The Liberty Fusion Gel Mattress possesses all the features of the Liberty Pressure Care Mattress yet takes into consideration the heating variability of the Australian climate, cooling and temperature needs for comfort and skin integrity, and the support needs of consumers with unproportioned body shapes (ie., dysmorphic).

By incorporating the advanced properties of FusionGel in the mattress construction, this unique combination of memory foam and gel creates a cooler, more pleasant sleeping environment via heat dissipation, and aids in regulating body temperature. Active support of the body is possible when these gel particles come together under pressure - providing pressure relief and stability where and when you need it most.

Features

- Australian Made
- Suitable for people who are at risk to medium risk of pressure injuries
- Latex free, multi-stretch, vapour-permeable top cover with enhanced infection control features
- High-quality, flame retardant, medical-grade Visco-elastic foam construction
- Dedicated, sloped foot and heel zone designed for offloading and immersion therapies
- Castellated foam top layer to aid in bed profiling, shear reduction and ventilation
- Firm safety side walls to aid in reducing falls risk
- Hinged base to conform to adjustable and profiling bed bases
- Hypoallergenic, Anti-Fungal and Anti-Microbially treated
- Suitable for all Adjustable and Companion Beds

Specifications

- Safe Working Load - 160kg (all sizes)

Pressure Care Mattress

Pressure Care Mattress

Pressure Care Mattress

The Liberty Pressure Care Mattress is a static foam, pressure redistribution surface designed to aid in immersion therapy, while delivering support, structure, safety and comfort to the consumer.

Constructed with high-quality, flame-retardant, medical-grade Visco elastic foam, this 3-layer castellated mattress also features a dedicated, sloped heel zone topped with memory foam. This assists in reducing pressure under the vulnerable heel, and in redistributing the load to more pressure-tolerant areas of the legs and calves.

Features

- Australian Made
- Suitable for people who are at risk to medium risk of pressure injuries
- Latex free, multi-stretch, vapour-permeable top cover with enhanced infection control features
- Firm safety side walls to aid in reducing falls risk
- Hinged base to conform to adjustable and profiling bed bases
- Hypoallergenic, Anti-Fungal and Anti-Microbially treated
- Suitable for all Adjustable and Companion Beds

Specifications

- Safe Working Load - 160kg (all sizes)

Bariatric Mattress

Bariatric Mattress

The Liberty Bariatric Mattress possesses all the features of the Liberty Pressure Care Mattress yet takes into consideration the support needs of the heavier consumer in the community.

The castellated foam top layer articulates with body movement and bed profiling for reduced shear and improved ventilation. The top cover fabric conforms to these castellations on the upper foam surface when the mattress is in use. This minimises rucking of the cover fabric on the top surface, reducing potential for tissue damage.

Specifications

- Safe Working Load - 200kg (all sizes)
