CATALOGUE**

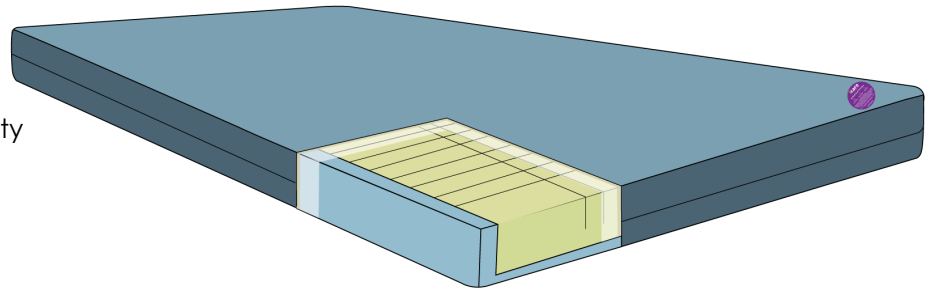

M1 MATTRESS

M1

HIGH RISK

SPECIFICATIONS

Feel Rating	Firm
Mattress Height	15cm
Risk Category	High Risk
User Weight	60kg - 300kg
Warranty	5 Year Warranty

KEY FEATURES

Suitable for Bariatric Users

Compatible with Icare Homecare Beds, this mattress can support user weight of up to 300kg.

Lateral Support

The unique lateral cut design assists with stability and support for transfers and is responsive to profiling platforms.

Two Layer Construction

One piece U shape firm base and side wall support with medium feel lateral castellated foam inlay. Designed especially to reduce roll-out risk and help with transfers.

Zerotec Cover

Zerotec fabric is a medical barrier fabric that has high elasticity in every direction which reduces shear on pressure redistribution surfaces. It is waterproof and wipeable but has microporous breathable properties. This cover has welded seams and waterfall flaps for fluid control.

SlideSkin™ Anti-Shear

The unique composition of SlideSkin™ technology reduces shear with a second membrane. This enables the cover to move or slide with the users movements.

Firm Edge Support

Prevents falls and roll-outs from the mattress and providing support for transfers.

SIZES, DIMENSIONS & CODES

Long Single	2030 x 900 mm	ICM1LS
King Single	2030 x 1070 mm	ICM1KS
Long Double	2030 x 1350 mm	ICM1D
Queen	2030 x 1530 mm	ICM1Q

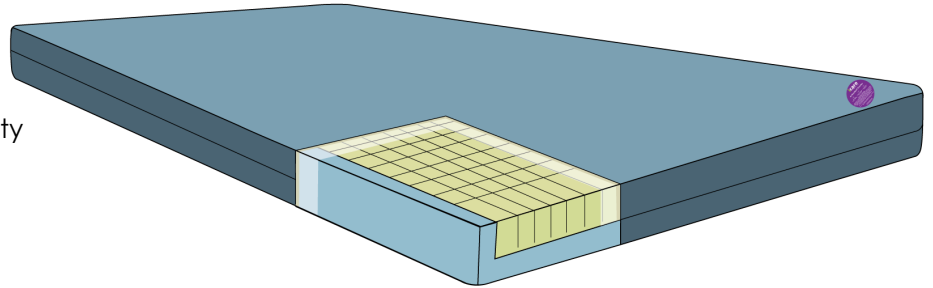

M2 MATTRESS

M2

HIGH RISK

SPECIFICATIONS

Feel Rating	Medium
Mattress Height	15cm
Risk Category	High Risk
User Weight	40kg - 215kg
Warranty	5 Year Warranty

KEY FEATURES

Castellated Support Surface

The castellated support surface allows each square to move to body contour. Module cutting also allows for horizontal anti-shear movement.

Two Layer Construction

One piece U shape firm XP Support Foam base and side wall support with medium feel with full module cut comfort layer foam inlay. Designed especially to reduce roll-out risk and bed falls.

Zerotec Cover

Zerotec fabric is a medical barrier fabric that has high elasticity in every direction which reduces shear on pressure redistribution surfaces. It is waterproof and wipeable but has microporous breathable properties. This cover has welded seams and waterfall flaps for fluid control.

SlideSkin™ Anti-Shear

The unique composition of SlideSkin™ technology reduces shear with a second membrane. This enables the cover to move or slide with the users movements.

Firm Edge Support

Prevents falls and roll-outs from the mattress and providing support for transfers.

SIZES, DIMENSIONS & CODES

Long Single	2030 x 900 mm	ICM2LS
King Single	2030 x 1070 mm	ICM2KS
Long Double	2030 x 1350 mm	ICM2D
Queen	2030 x 1530 mm	ICM2Q

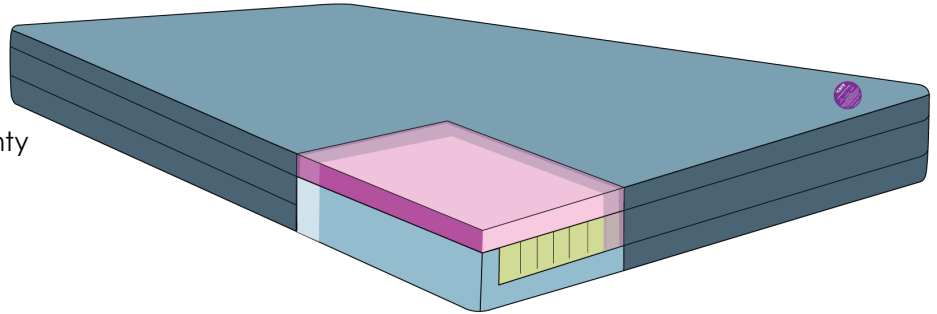

M3 MATTRESS

M3

HIGH RISK

SPECIFICATIONS

Feel Rating	Medium
Mattress Height	20cm
Risk Category	High Risk
User Weight	30kg - 215kg
Warranty	5 Year Warranty

KEY FEATURES

ActiveFloat™ Layer

Our latest technology is an extremely elastic and highly breathable material designed to move in every direction even after full compression. This not only reduces shear in every direction but greatly increases user comfort.

Edge to Edge

The full ActiveFloat™ layer provides edge to edge support for users eliminating ridges and increasing pressure redistribution area.

Three Layer Construction

One piece U shape firm XP Support Foam base and side wall support with medium feel lateral castellated foam inlay. Designed especially to reduce roll-out risk and bed falls.

Zerotec Cover

Zerotec fabric is a medical barrier fabric that has high elasticity in every direction which reduces shear on pressure redistribution surfaces. It is waterproof and wipeable but has microporous breathable properties. This cover has welded seams and waterfall flaps for fluid control.

SlideSkin™ Anti-Shear

The unique composition of SlideSkin™ technology reduces shear with a second membrane. This enables the cover to move or slide with the users movements.

SIZES, DIMENSIONS & CODES

Long Single	2030 x 900 mm	ICM3LS
King Single	2030 x 1070 mm	ICM3KS
Long Double	2030 x 1350 mm	ICM3D
Queen	2030 x 1530 mm	ICM3Q

Note: The M3 has an unparalleled user comfort rating which is a crucial factor and often overlooked when choosing a suitable mattress.
